

Restorative Circle Web-App

A fun, creative way to seek participation
and organize ideas & information

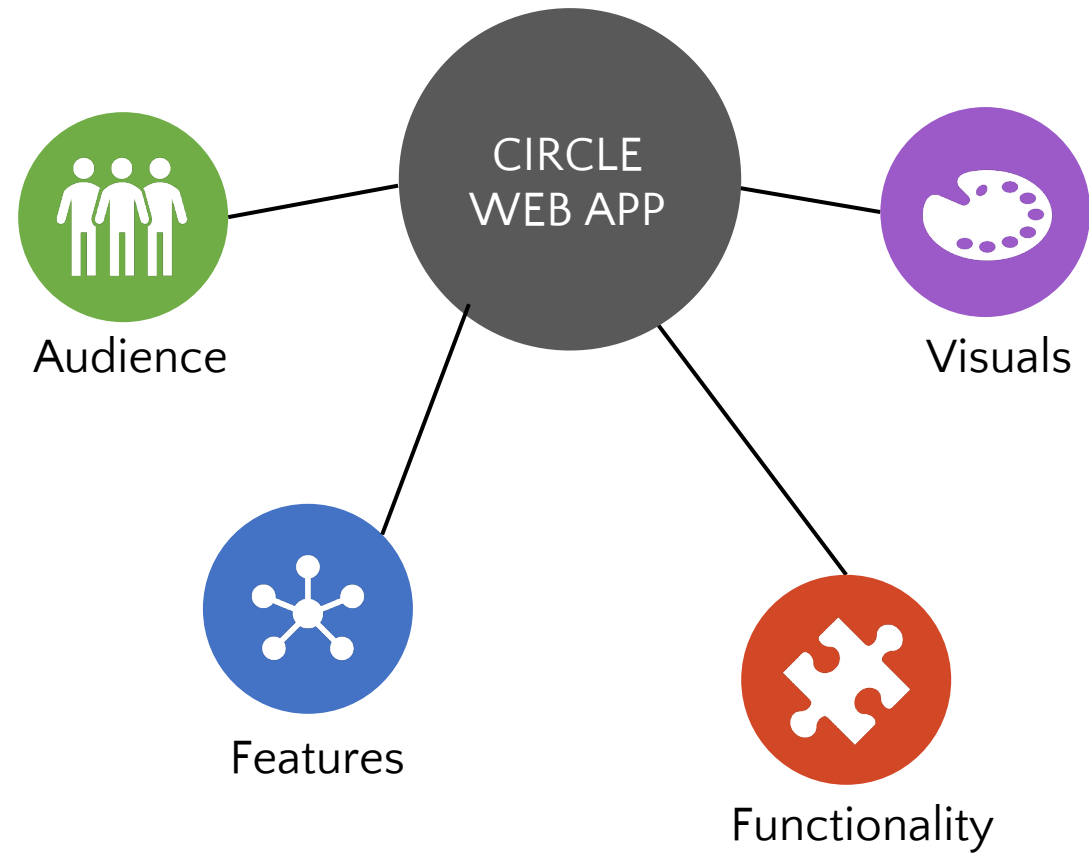

Contents

- 1. Restorative Circle: Web-App 1
 - 1.1 Audience 2
 - 1.2 Features: Mind Map 3
 - 1.3 Functionality 4
 - 1.4 Visuals 6
- 2. Schematic 7
- 3. Focus 12
- 4. Future Scope 13

1 | Restorative Circle: Web-App

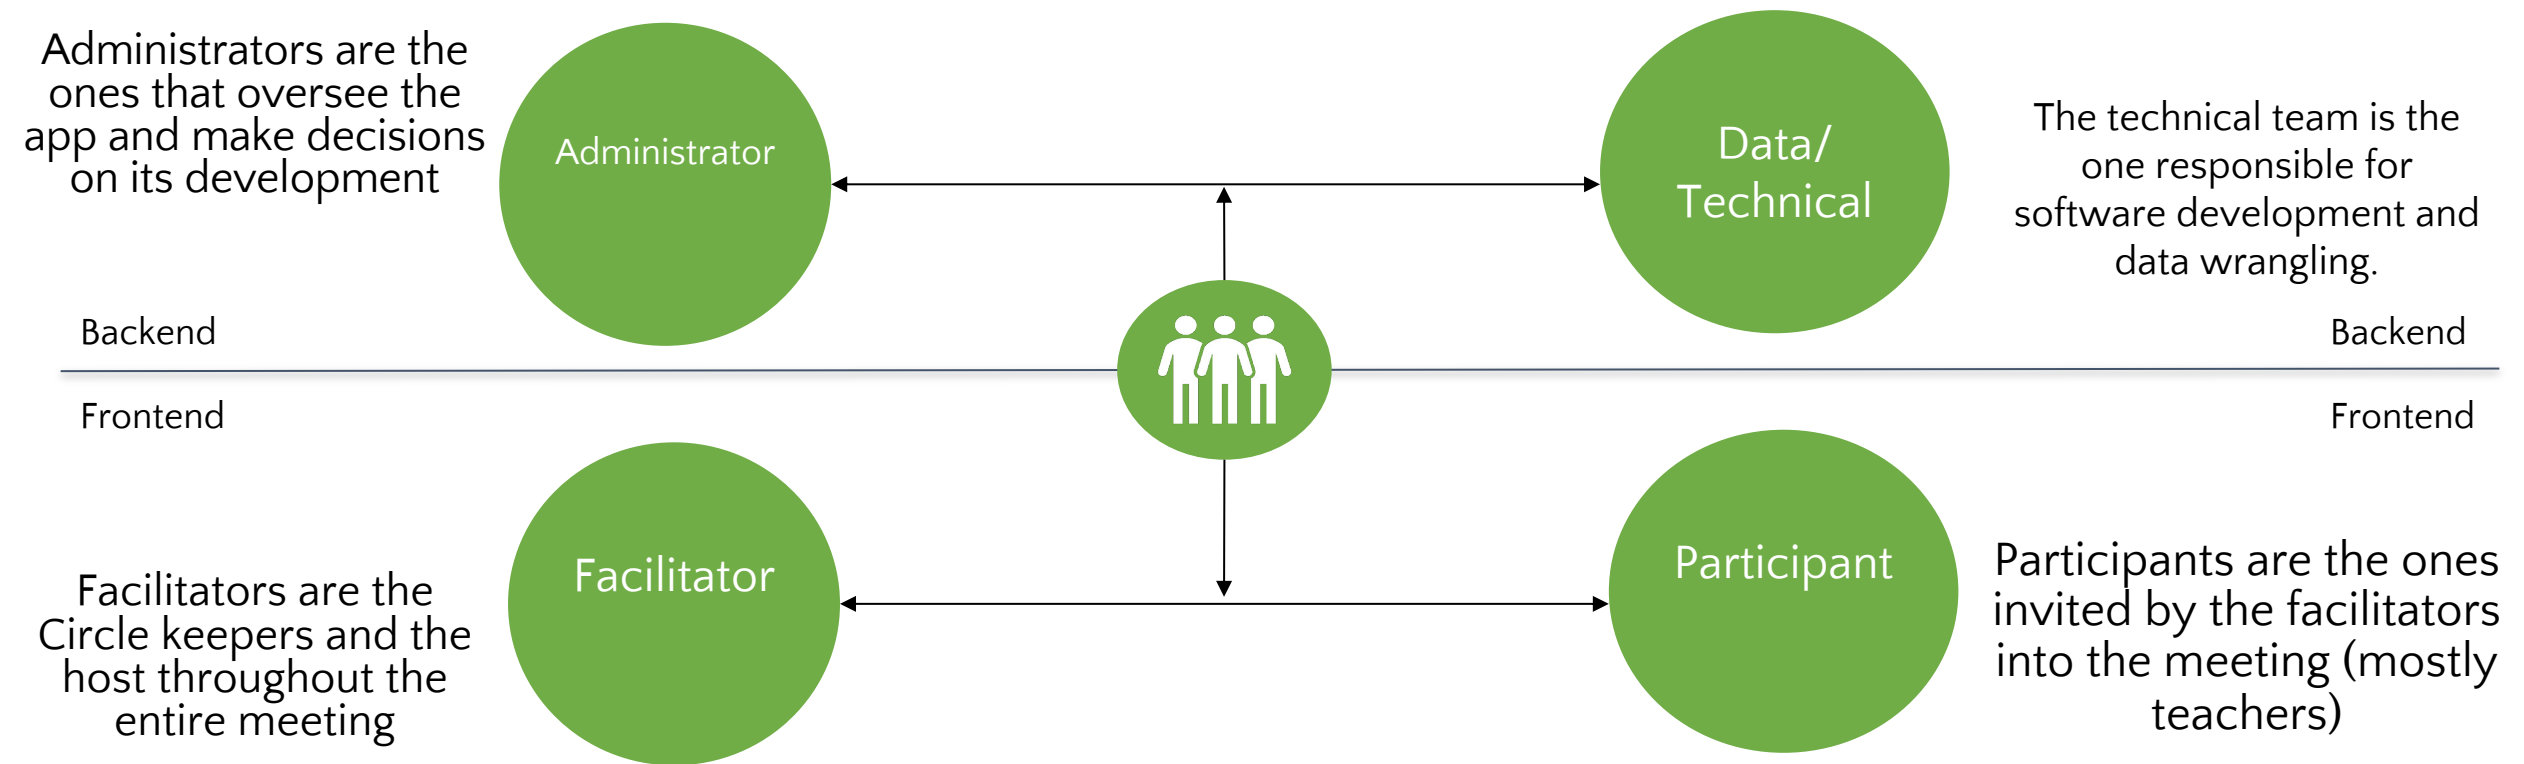

The four main divisions would be:

- Audience
- Features
- Functionality
- Visuals

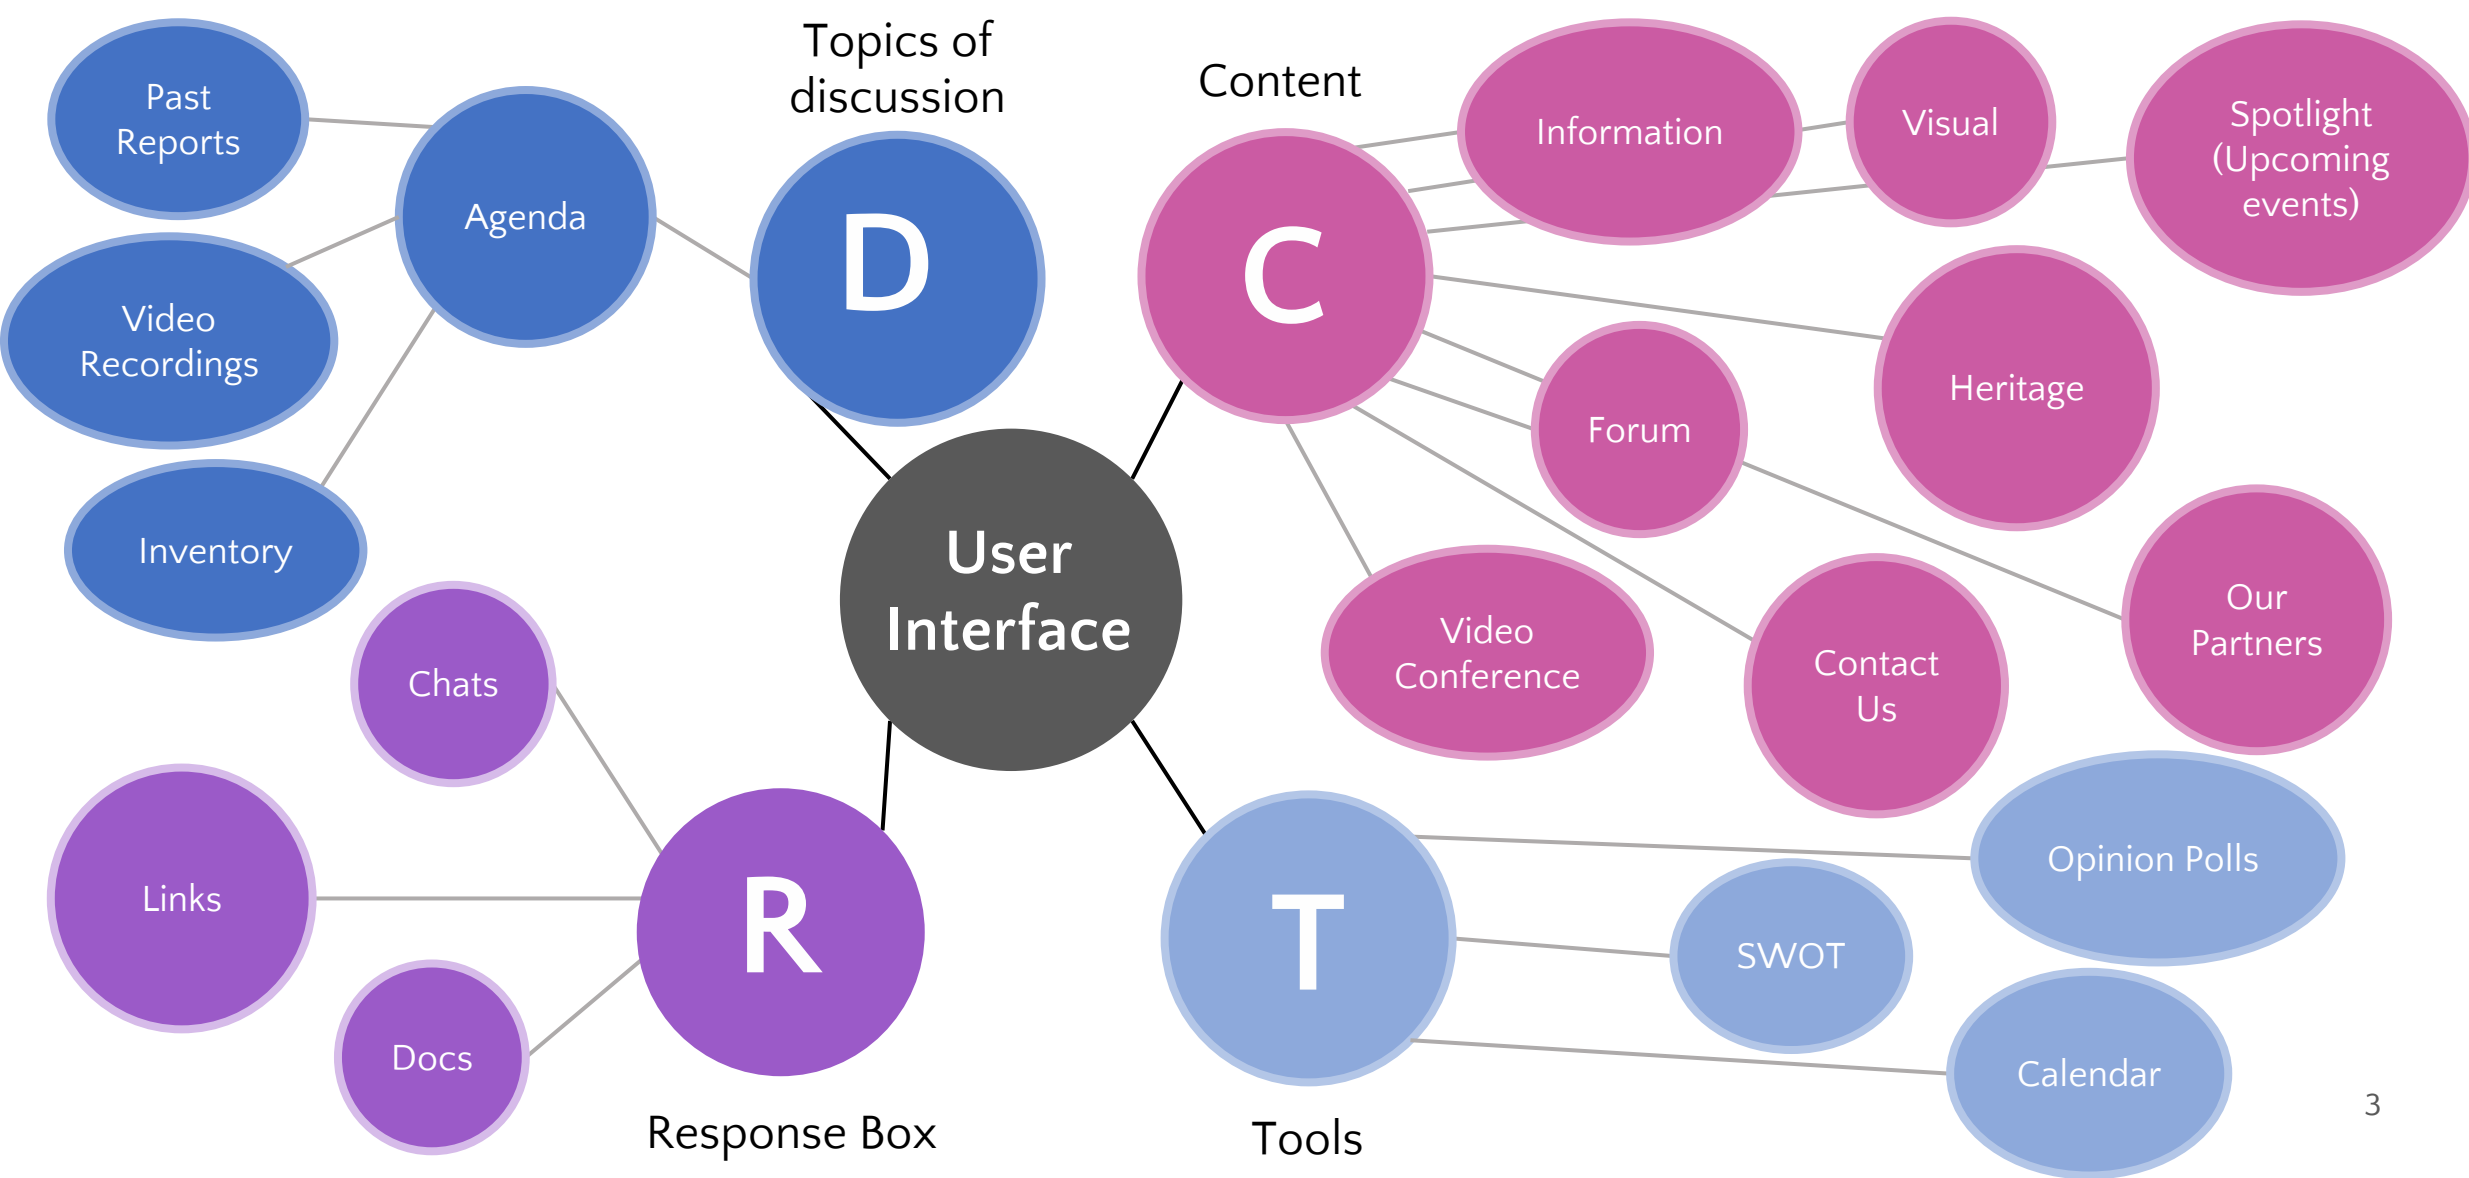

1.1 | Audience

LEVEL OF USERS

1.2 | Features: Mind Map

1.3 | Functionality

Some important considerations in Restorative functionality:

Seeking participation of all with interactive voting system and analytically recording data

Reporting system where someone in a Circle can report them and the facilitator can oversee it and they have the power to handle the situation

Progressing through the meeting in different phases (options available) that the host can choose

The host can also add a phase at the start of the meeting with a heading of his choice

Simultaneously creating a report (background) throughout the session while keeping it organized (Optional)

1.3 | Functionality

Some important considerations in functionality:

A gentle reminder for each phase will be shown on the screen to keep track of time. It will be based on total time of the meeting and the number of phases.

Host can pull out different available lean tools (like SWOT) from the interface into the meeting

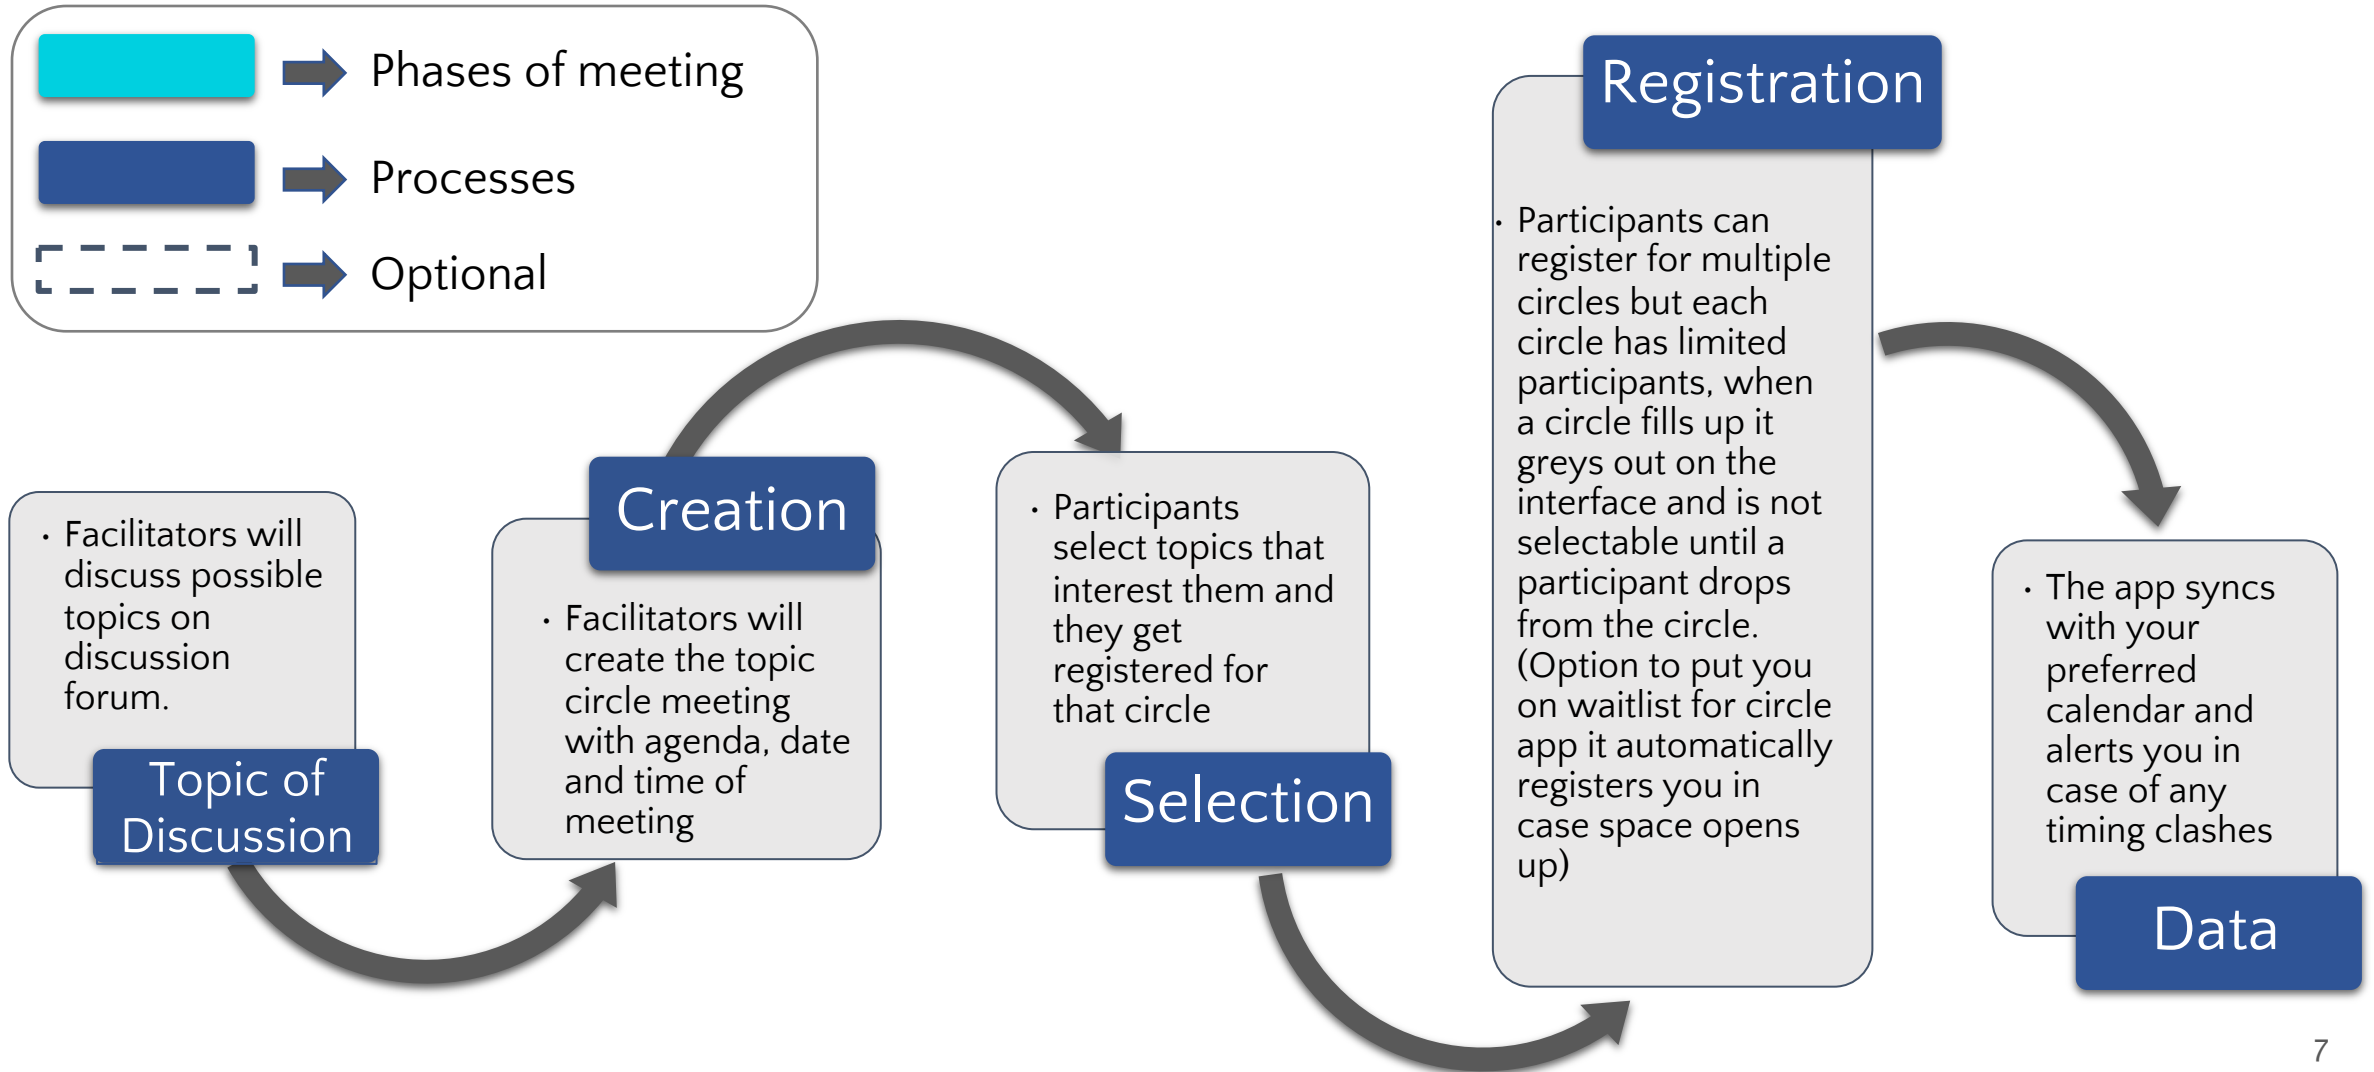

Host can pull out the 'opinion polls' whenever he feels majority of inputs for the decision are required

The host can temporarily switch his role with any one participant If he wishes to, in case it is needed.

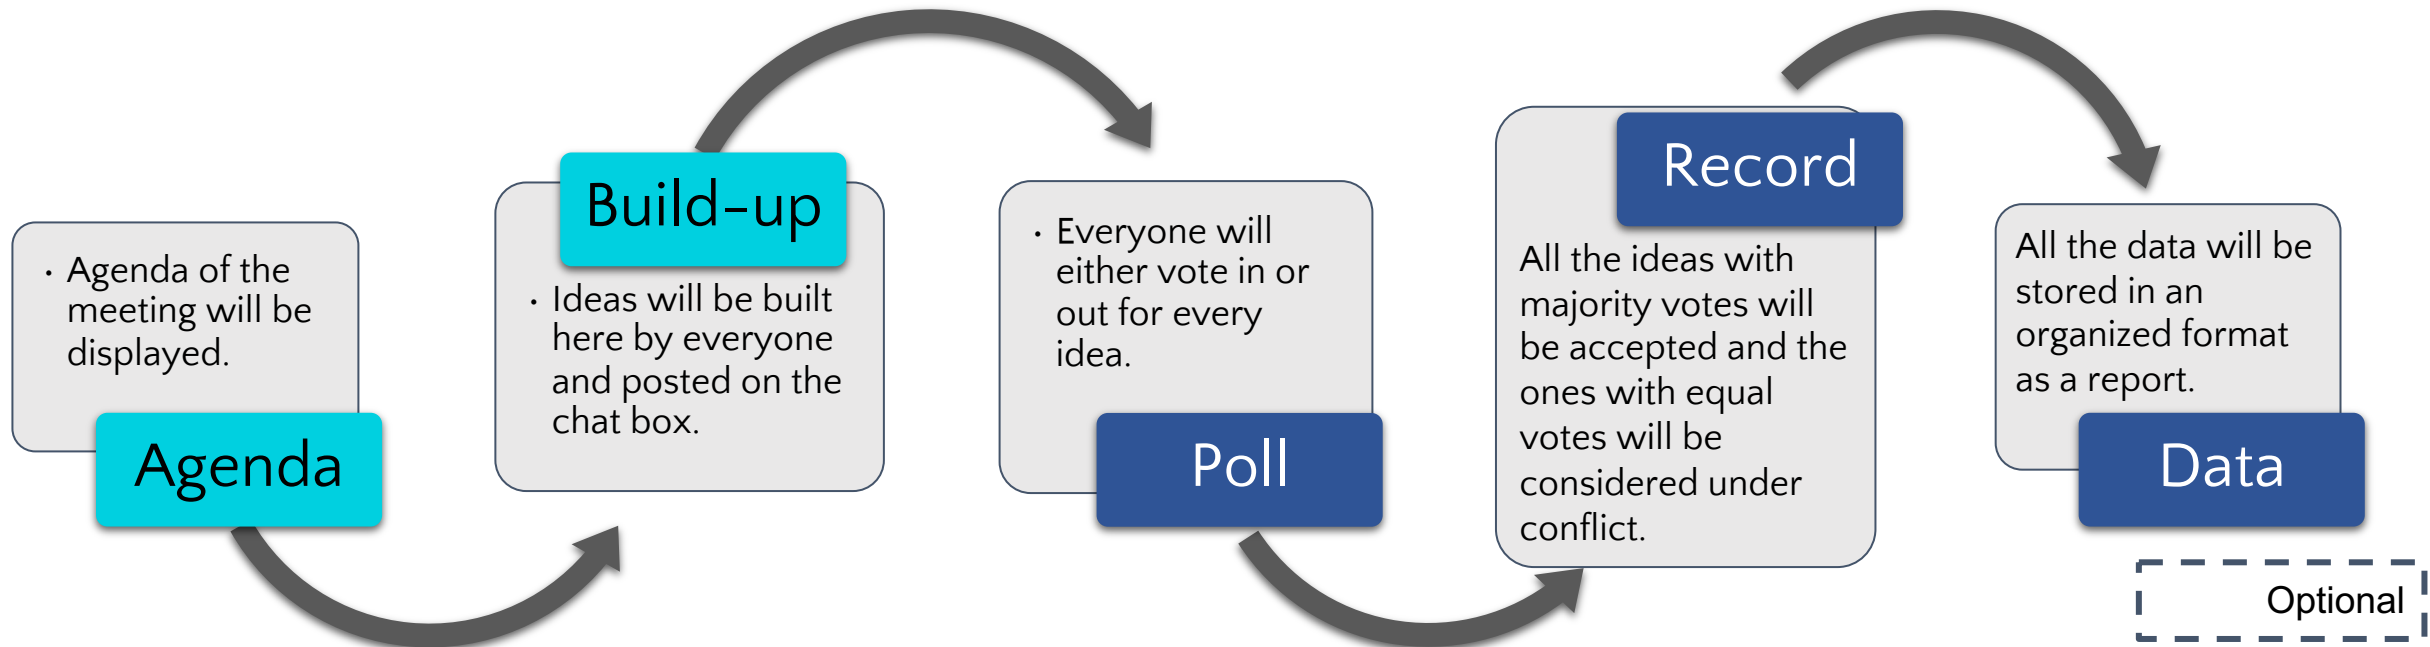

1.4 | Visuals

TO BE WORKED ON LATER!!

2 | Schematic

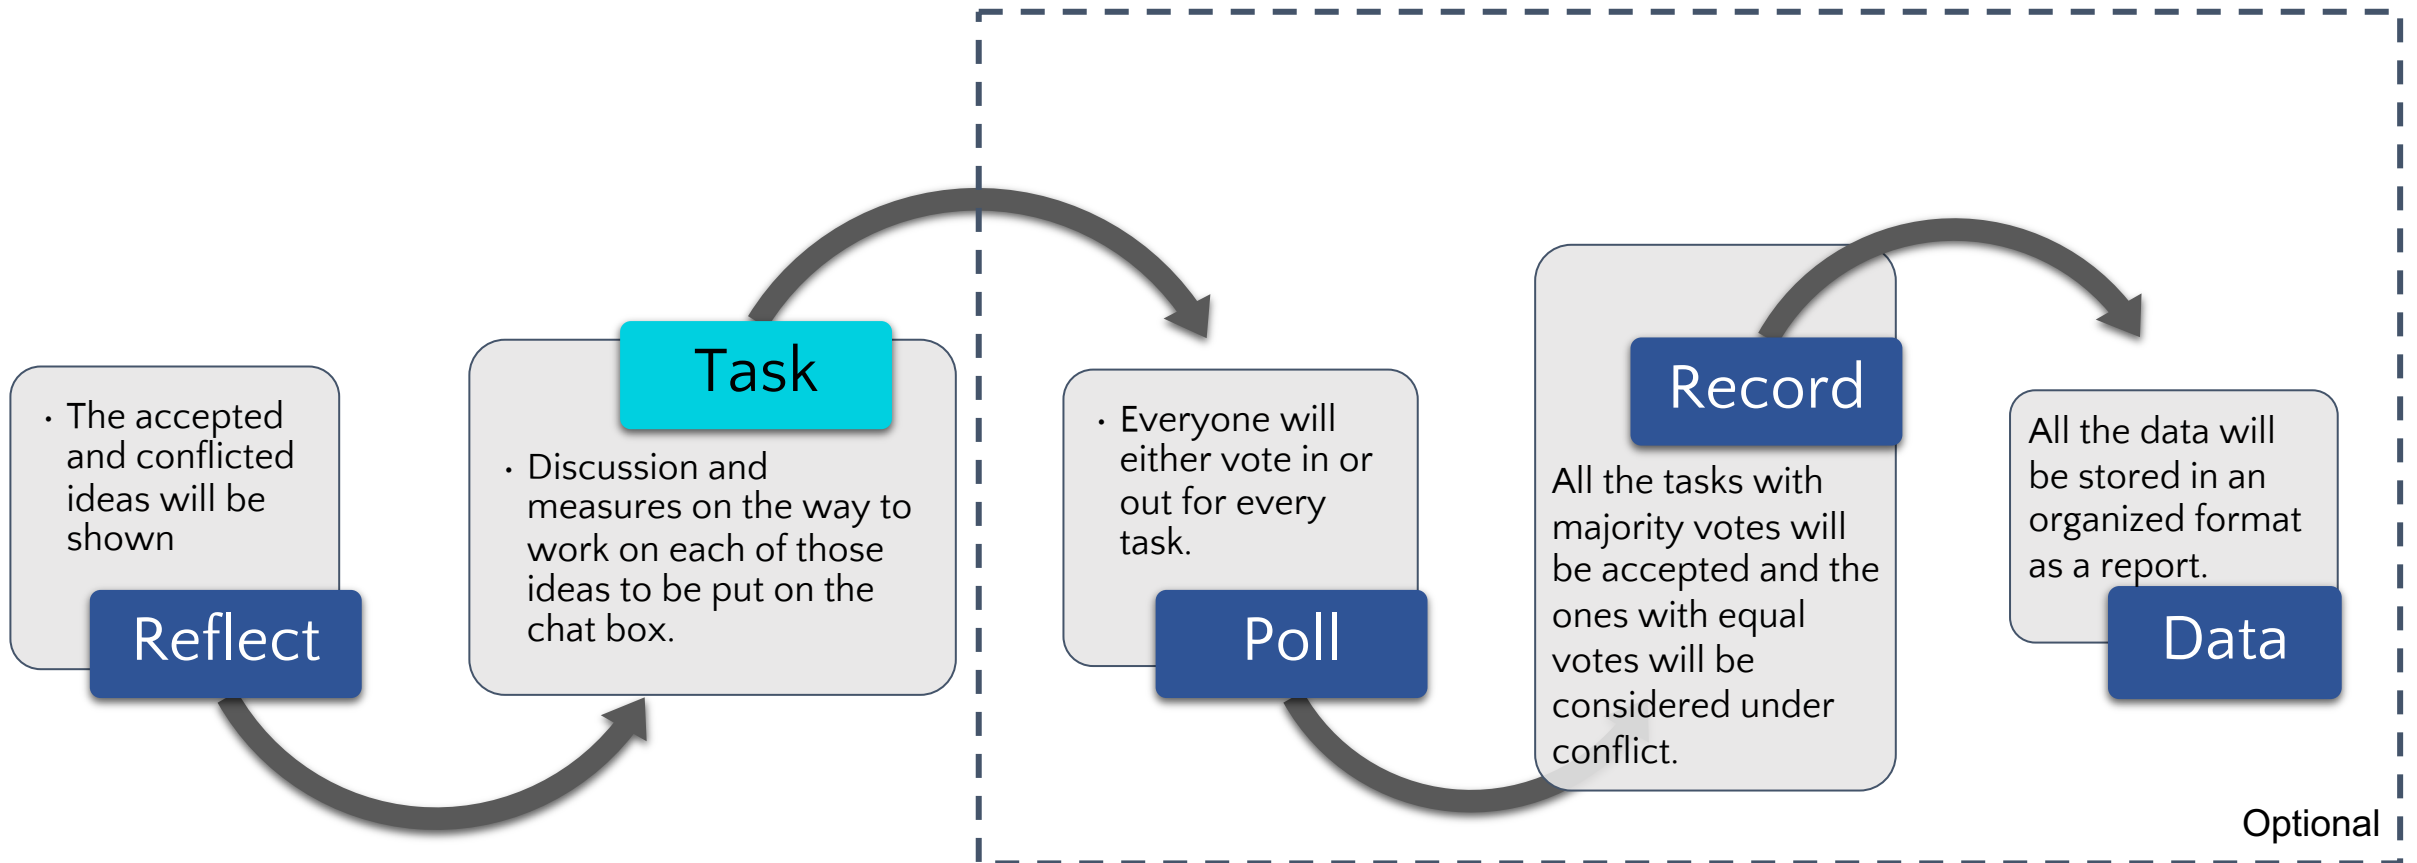

2 | Schematic

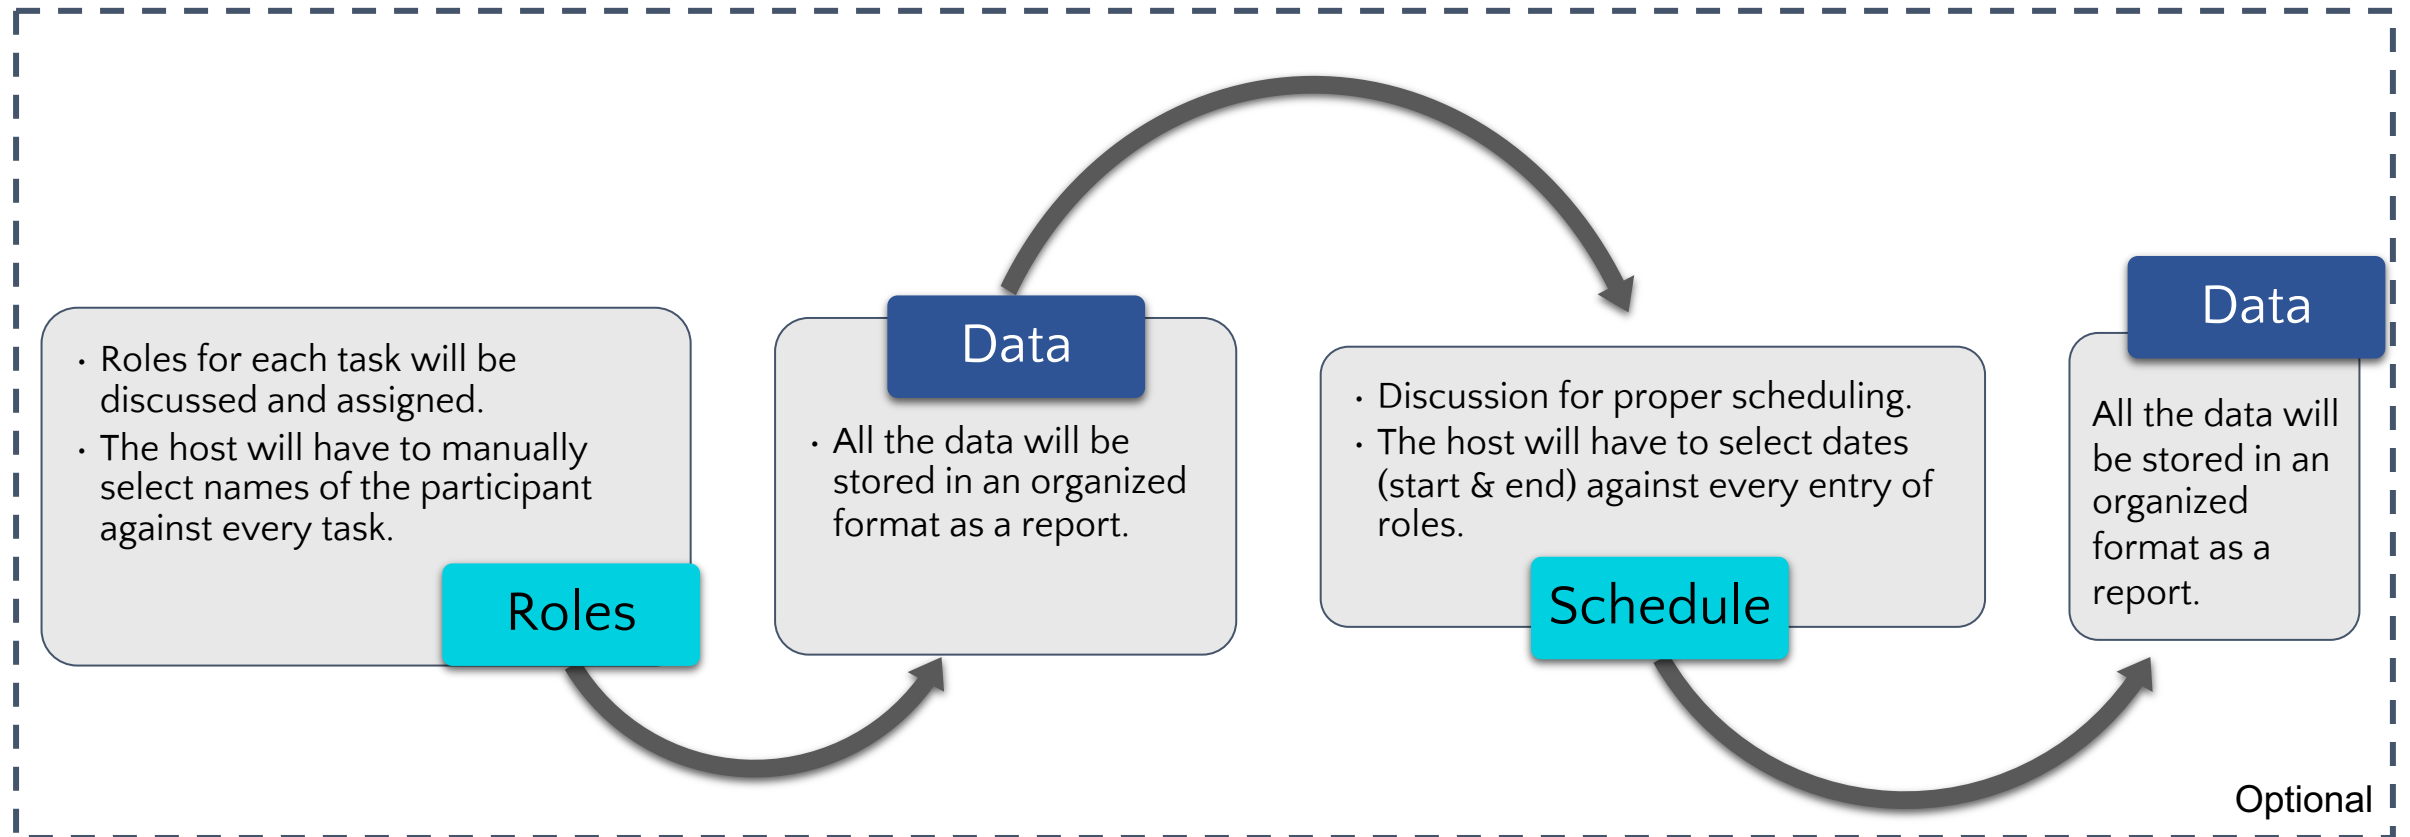

2 | Schematic

IT IS A LOOP UNTIL ALL IDEAS HAVE BEEN ASSIGNED WITH TASKS

2 | Schematic

GO WITH THE FLOW!!

2 | Schematic

Meeting log

- ❓ The final meeting log will contain the partially processed data from the discussion during the meeting.
- ❓ It will be organized as per the count of votes, flow and various other parameters.
- ❓ It will be available to the team/facilitator to access it anytime when necessary

❖ Data is recorded systematically

Agenda
Build-up
Tools used
Tasks
Roles
Schedule
Conclusion
Analytics: Time, votes, participation

Page

3 | Focus

- 1 Brainstorm on current ideas
- 2 Eliminate the excess
- 3 Understand the purpose better
- 4 Distribute work to improve efficiency

4 | Future Scope

- 1 Web developing and Database integration
- 2 Functionality in working
- 3 Visuals & Aesthetics
- 4 User friendly interface
- 5 Designated split platform for students
